### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 103***

2. Claims 1 - 8 and 12 - 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lichter et al. in view of Robinson. Lichter et al. teach a PCMCIA based measurement system that allows a medical sensor, including an optical-based glucose sensor (Figure 19; column 14, lines 36 - 46), to be coupled via a communication and power interface to an external computer (column 4, lines 34 - 55). Lichter et al. provide details of the initial configuration process that occurs when the PCMCIA card is attached to the host computer, which includes "set up" of the PC card and data transfer between the sensor and the computer (column 8, line 46 - column 9, line 35). However, Lichter et al. do not provide details of the non-invasive optical glucose sensor. Robinson teach an optical glucose sensor, that includes a polychromatic light source, a receptor for receiving the part of the subject where the measurement is to be performed, a light receptor, a dispersion element, and a photodetector (see columns 14 - 25). It would have been within the skill level of the art at the time of the invention to implement the non-invasive optical glucose sensor of Lichter et al. with the arrangement as taught by Robinson, as Lichter et al. require a non-invasive optical glucose sensor and Robinson teaches one such arrangement.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1 - 8 have been considered but are moot in view of the new ground(s) of rejection.
4. Applicant's arguments, see remarks pages 8 - 9, filed 19 November 2003, with respect to claims 9 - 11 have been fully considered and are persuasive. The rejection of claims 9 - 11 has been withdrawn.

***Allowable Subject Matter***

5. Claims 9 - 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
